Color Palette

I would like to stick with my current color pallet as much as possible.

These are the post categories.

I like the *AnythingSlider jQuery Plugin* found here: <http://bit.ly/1ki7LH>

Regardless, I want the slider to do three things:

- Auto-rotate
- Display the number of panels
- Allow the user to advance the panels by clicking the arrows on either side.

I really like the date to the side of the post title like here:

<http://www.elegantthemes.com/preview/CherryTruffle/>

I also want a comments bubble next to the post title with the comments count. This should be similar to what I have now at michaelhyatt.com.

I am currently using Google custom search without the ads. I like it.

I envision a JavaScript widget here, like the ones used on many of the WooTheme designs.

This can just be a simple Twitter feed like I have now.

I would like this to pull up a random quote each time the page is refreshed. I am storing these quotes as regular posts in the Resources category with the Quote tag.

Notes

I like the related posts that display the posts thumbnail picture with them. See here: <http://bit.ly/2fooQj>

In addition to the socialable icons, I want a print icon that will allow someone to print out the post without the sidebar and footer stuff.

I want the new comment input box to be at the top of the comment stream, so that the user doesn't have to scroll all the way to the bottom of the page.

Notes

I want this template available for development purposes. I may use it to create a gallery of photos, video clips, or other items.
